

# DSA Homework (15 Levels) — Expanded Question Bank

**Submission:** GitHub repo (mandatory)

**Deadline:** 3 weeks from issue date

## Rule per level (Applies to all 15 levels)

- Each level contains **multiple questions** under Easy, Medium, and Hard.
  - Students must complete **ANY 2 Easy + ANY 1 Medium + ANY 1 Hard (OPTIONAL)** per level.
  - Must complete **Any 7 levels**.
  - Solving more is encouraged (bonus practice).
- 

## Level 1 — Fundamentals (Language Basics)

### Easy (choose any 2)

1. Basic Input/Output [Link](#)
2. Conditional Statements [Link](#)
3. Loops Practice [Link](#)
4. Data Types Quiz [Link](#)
5. Operators Practice [Link](#)

### Medium (choose any 1)

1. Array MCQ [Link](#)
2. Functions MCQ [Link](#)
3. String Basics [Link](#)

### Hard (choose any 1)

1. Pattern Printing [Link](#)
2. Mixed Logic MCQ [Link](#)

---

# Level 2 — Arrays

## Easy

1. Largest Element [Link](#)
2. Second Largest Element [Link](#)
3. Reverse Array [Link](#)
4. Remove Duplicates from Sorted Array [Link](#)
5. Check If Array Sorted [Link](#)

## Medium

1. Two Sum [Link](#)
2. Rotate Array [Link](#)
3. Longest Subarray with Sum K [Link](#)

## Hard

1. First Missing Positive [Link](#)
  2. Maximum Product Subarray [Link](#)
- 

# Level 3 — Sorting & Searching

## Easy

1. Binary Search [Link](#)
2. Peak Index in Mountain Array [Link](#)
3. First Bad Version [Link](#)
4. Search Insert Position [Link](#)
5. Guess Number Higher or Lower [Link](#)

## Medium

1. Search in Rotated Sorted Array [Link](#)
2. Find Minimum in Rotated Sorted Array [Link](#)
3. Koko Eating Bananas [Link](#)

## Hard

1. Divide Two Integers [Link](#)
  2. Median of Two Sorted Arrays [Link](#)
- 

# Level 4 — Two Pointers

## Easy

1. Move Zeroes [Link](#)
2. Valid Palindrome [Link](#)
3. Squares of Sorted Array [Link](#)
4. Reverse String [Link](#)
5. Merge Strings Alternately [Link](#)

## Medium

1. Container With Most Water [Link](#)
2. 3Sum [Link](#)
3. Sort Colors [Link](#)

## Hard

1. Trapping Rain Water [Link](#)
  2. 4Sum [Link](#)
- 

# Level 5 — Sliding Window

## Easy

1. Best Time to Buy and Sell Stock [Link](#)
2. Maximum Average Subarray I [Link](#)
3. Max Consecutive Ones [Link](#)
4. Contains Duplicate II [Link](#)
5. Diet Plan Performance [Link](#)

## Medium

1. Max Consecutive Ones III [Link](#)
2. Longest Substring Without Repeating Characters [Link](#)
3. Fruit Into Baskets [Link](#)

## Hard

1. Sliding Window Median [Link](#)
  2. Minimum Window Substring [Link](#)
- 

# Level 6 — Strings (Easy Focus)

## Easy

1. Add Strings [Link](#)
2. Valid Anagram [Link](#)
3. Reverse Words in a String III [Link](#)
4. Detect Capital [Link](#)
5. To Lower Case [Link](#)

## Medium

1. Group Anagrams [Link](#)
2. Longest Palindromic Substring [Link](#)
3. String to Integer (atoi) [Link](#)

## Hard

1. Distinct Subsequences [Link](#)
  2. Regular Expression Matching [Link](#)
- 

# Level 7 — Recursion

## Easy

1. Fibonacci Number [Link](#)
2. Power of Two [Link](#)
3. Reverse String [Link](#)

4. Sum of Digits [Link](#)

## Medium

1. Pow(x, n) [Link](#)
2. Generate Parentheses [Link](#)

## Hard

1. K-th Symbol in Grammar [Link](#)
  2. Expression Add Operators [Link](#)
- 

# Level 8 — Stacks

## Easy

1. Valid Parentheses [Link](#)
2. Implement Stack using Queues [Link](#)
3. Baseball Game [Link](#)
4. Remove Outermost Parentheses [Link](#)

## Medium

1. Min Stack [Link](#)
2. Daily Temperatures [Link](#)
3. Evaluate Reverse Polish Notation [Link](#)

## Hard

1. Largest Rectangle in Histogram [Link](#)
  2. Basic Calculator [Link](#)
- 

# Level 9 — Linked Lists

## Easy

1. Reverse Linked List [Link](#)

2. Middle of Linked List [Link](#)
3. Remove Duplicates from Sorted List [Link](#)
4. Linked List Cycle [Link](#)

## Medium

1. Intersection of Two Linked Lists [Link](#)
2. Remove Nth Node from End [Link](#)
3. Reorder List [Link](#)

## Hard

1. Merge k Sorted Lists [Link](#)
  2. Reverse Nodes in k-Group [Link](#)
- 

# Level 10 — Trees

## Easy

1. Maximum Depth of Binary Tree [Link](#)
2. Invert Binary Tree [Link](#)
3. Same Tree [Link](#)
4. Path Sum [Link](#)

## Medium

1. Validate BST [Link](#)
2. Binary Tree Level Order Traversal [Link](#)
3. Lowest Common Ancestor [Link](#)

## Hard

1. Binary Tree Maximum Path Sum [Link](#)
  2. Serialize and Deserialize Binary Tree [Link](#)
- 

# Level 11 — Tries

## Easy

1. Implement Trie [Link](#)
2. Longest Common Prefix [Link](#)

## Medium

1. Design Add and Search Words [Link](#)
2. Replace Words [Link](#)

## Hard

1. Word Search II [Link](#)
  2. Concatenated Words [Link](#)
- 

# Level 12 — Backtracking

## Easy

1. Subsets [Link](#)
2. Permutations [Link](#)

## Medium

1. Palindrome Partitioning [Link](#)
2. Combination Sum [Link](#)

## Hard

1. N-Queens [Link](#)
  2. Sudoku Solver [Link](#)
- 

# Level 13 — Heap / Priority Queue

## Easy

1. Last Stone Weight [Link](#)

2. Kth Largest Element [Link](#)
3. Relative Ranks [Link](#)

## Medium

1. K Closest Points [Link](#)
2. Top K Frequent Elements [Link](#)
3. Reorganize String [Link](#)

## Hard

1. Find Median from Data Stream [Link](#)
  2. Sliding Window Maximum [Link](#)
- 

# Level 14 — Dynamic Programming

## Easy

1. Climbing Stairs [Link](#)
2. Min Cost Climbing Stairs [Link](#)
3. Divisor Game [Link](#)

## Medium

1. House Robber [Link](#)
2. Coin Change [Link](#)
3. Word Break [Link](#)

## Hard

1. Burst Balloons [Link](#)
  2. Edit Distance [Link](#)
- 

# Level 15 — Graphs

## Easy

1. Number of Provinces [Link](#)
2. Rotting Oranges [Link](#)
3. Flood Fill [Link](#)
4. Max Area of Island [Link](#)
5. Find the Town Judge [Link](#)
6. Island Perimeter [Link](#)

## Medium

1. Course Schedule [Link](#)
2. Number of Islands [Link](#)
3. Surrounded Regions [Link](#)
4. Pacific Atlantic Water Flow [Link](#)
5. Shortest Path in Binary Matrix [Link](#)

## Hard

1. Swim in Rising Water [Link](#)
  2. Word Ladder II [Link](#)
  3. Alien Dictionary [Link](#)
  4. Critical Connections in a Network [Link](#)
  5. Minimum Cost to Connect All Points [Link](#)
- 

# Submission (GitHub Repo) — Mandatory

## Repository name

dsa-homework

## Folder structure

```
dsa-homework/
  level-01/
  level-02/
  ...
  level-15/
  README.md
```

## Mandatory in EVERY code file

1. **Problem link** at the top as a comment
2. **Short explanation comments** for approach and logic
3. **Complexity analysis at bottom**

**Template to include in every file:**

```
// Time Complexity:  
// Best:  
// Average:  
// Worst:  
// Space Complexity:
```

## README.md must include

- Student Name
- Programming Language used
- Level-wise list of solved questions
- How to run code locally

**I know a person's capability with just one talk.**

**Use of all resources is allowed, AI included. Don't Be Oversmart.**

**Homework is for learning.**

**I am not going to be at fault If you Cheat.**
